

# IGF 2020 Best Practice Forum

## Data and New Technologies in an Internet context

Virtual meeting II

Friday 17 April

15:00 UTC

## Agenda

1. Welcome & introduction
2. Overview & feedback on BPF's focus and work plan
3. Discussion : Data & New Technologies and COVID-19
4. AoB & next steps

## 1. Welcome & introduction

## 2. BPF Data and New Technologies - Focus & work plan

-> data from connected devices, networks and applications contributes to solving complex problems and facing global challenges.

-> concerns are growing on how the same data can be used and abused and risks to put users in a weak and powerless position.

### *BPF's focus:*

How is users' data is collected, analyzed and used, and what are best practices to ensure that it is used to bring benefit and not to harm users.

### Workplan :

(1) identify the issues; (2) identify stakeholders and stakeholder dialogues; (3) collect and share best practices

### 3. Data & New Technologies and COVID-19

- We witness a stream of new initiatives, developments and applications to manage and fight the COVID-19 crisis.
- Many of them make use of user data and new technologies ( IoT, Big Data, AI ).
- Concerns about the privacy and protection of the users, are often moved to the second plan because of the urgency of the situation.
- Within its original focus, the BPF can serve as a platform to identify and define the main concerns and collect best practices to feed into policy discussions !

### 3. Data & New Technologies and COVID-19

How can the BPF do this ?

- What are the most urgent questions and concerns ?
- What (type of) best practices should the BPF collect ?
- How / where to find these best practices ?

?

## 4. AoB & Next Steps

- Next steps ?
- Next call ?
