2. Topic of the BPF Data and New Technologies

-> the vast variety and high volume of data from connected devices, networks and applications contributes to solving complex problems and facing global challenges.

-> concerns are growing on how the same data can be used and abused and risks to put users in a weak and powerless position.

The BPF will focus on how users' data is collected, analyzed and used, and best practices to ensure that the data is used to bring benefit and not to harm users.

3. Draft Work Plan

1) Identify the issues to cover

- How to ensure that data shared by users is used for the benefit of the user and its community?
- Is it inevitable to live in a world without privacy?
- How can users be empowered to (re-)gain control of their data, and limit unwanted control on their lives by companies and governments?
- ...

2) Identify stakeholders and existing stakeholder dialogue

- What is the current state of discussions?
- Who are stakeholders that are/should be involved?
- What role can stakeholders play?
-

3) Collecting and sharing of best practices

- Collecting and sharing existing projects and initiatives.

Cross cutting topics:

ethics, data trusts, digital literacy, awareness raising and capacity building to empower users to (re-)gain control over their data, ...

4. Feedback on work plan and issues to cover

- Your feedback ? Ideas? Suggestions?
- Outreach ? People or organizations to invite to the BPF?
